

Speedywall Full Kit

SWFK01

- 64 wall panels and eight door supports
- No skilled trades needed – can be installed by anyone! Simply connect the pieces together following the one-page manual
- Quick to set-up – quick assembly and collapse adapts easily to changing requirements
- Easy to sanitise - made from heavy-duty polypropylene allowing super-quick wash down
- Lightweight – easy to setup on your own or with a team
- Heavy-duty fluted plastic – durable fluted plastic construction creates impact resistance
- Flame retardant – made from a heavy duty 8mm flame retardant material
- Re-usable – panels can be stored easily between uses
- Versatile configuration – endless opportunities to build screens and rooms as required using the supplied simple connectors

Speedywall is a rapid-deployment temporary wall system used to screen or partition areas into smaller zones, quickly and efficiently.

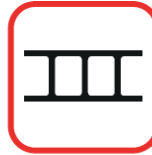

It has infinite uses in commercial and office spaces, healthcare settings, in the building and construction sector, and in retail environments.

It is available in a 26 wall panel Starter Kit (SWSK01) or in the Full Kit (SWFK01) of 64 wall panels.

Speedywall Full Kit

No skilled trades required
Speedywall can be installed by anyone!
Simply connect the pieces together following the one page manual.

Heavy duty fluted plastic
Durable fluted plastic construction gives Speedywall impact resistance, whilst remaining lightweight and easy to clean.

Easy to sanitise
Made from heavy duty polypropylene allowing a super quick and easy washdown where required.

Flame retardant
Made from a heavy duty 8mm flame retardant material.

Quick to setup
Quick assembly and collapse mechanism means Speedywall is easy to adapt to changing requirements.

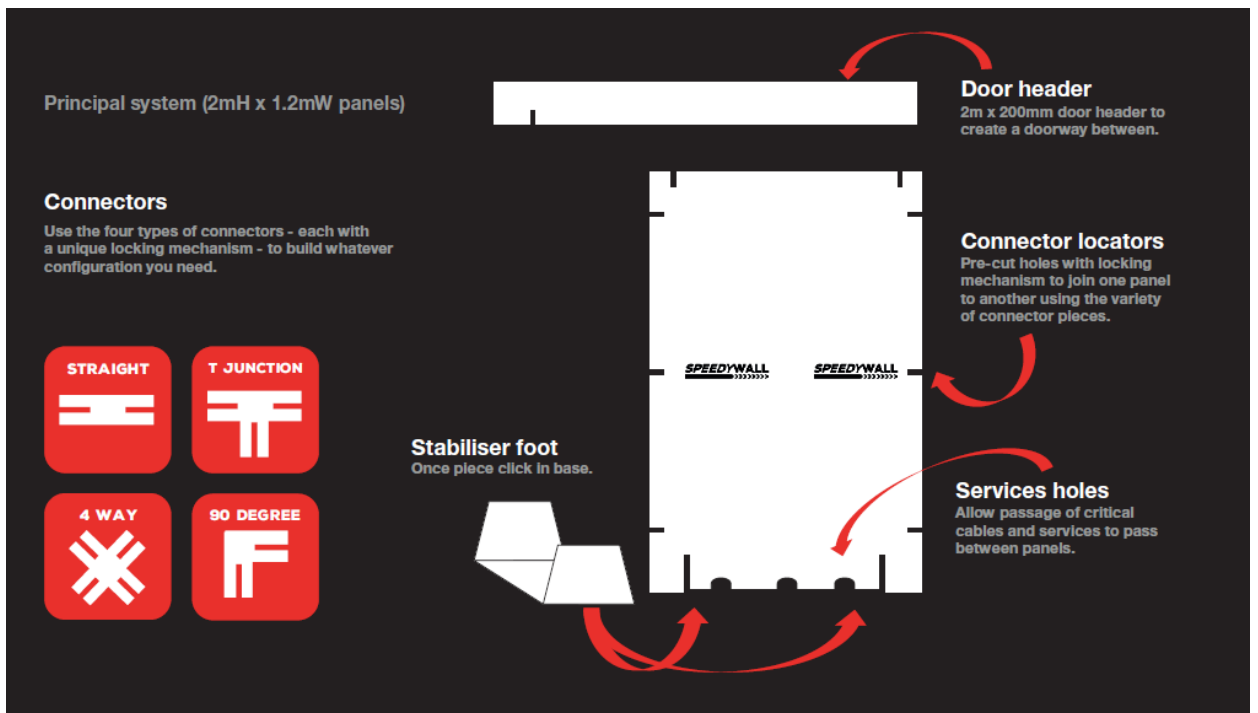

Re-usable
Once the requirement is over, the system can be stored easily for future use.

Lightweight
Easy to setup on your own or with a team.

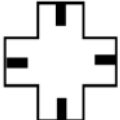

Versatile configuration
Endless opportunities to build screens and rooms as you require using the simple connectors supplied with the kit.

Speedywall Full Kit

Qty	Type	Use	Material	Picture	Properties
128	<u>Corner Connector</u>	Use 3 Corner Connectors to create any right angled corner	8mm /1600 White Polypropylene		Flame Retardant
48	<u>Cross Connector</u>	Use 3 Cross Connectors any time you need to connect 4 panels together	8mm /1600 White Polypropylene		Flame Retardant
